

DATA WORKSHOPS

Professional Learning for Data Empowerment

Achieving the Dream can support your internal efforts to build capacity among faculty and staff to use evidence-based data strategies, including those focused on next-generation metrics, to improve equitable student outcomes.

Truly serving your students means no one gets lost in the shuffle — or the numbers. We take a deep dive into how your people, processes, and systems use data and technology to build and refine strategies for student success.

ATD's Data Empowerment workshop can

- Drive real change for students by enabling you to continuously analyze and act on your data
- Show you what's important by measuring what's working and keep you improving every step of the way

Dig Into Foundational Strategies and Practices with ATD's Full Suite of Workshops

Interested in diving into other topics? ATD's dynamic, action-driven workshops cover a wide variety of student success strategies.

ATD's workshops empower stakeholders with foundational strategies and practices that address the issues most pressing to your college. Through focused, tailored, interactive learning sessions, our workshops tackle key challenges facing institutions and equip participants with proven actionable solutions. Each workshop is carefully crafted to inspire collaboration, address critical issues, and deliver transformative insights that make a real impact on your campus.

Achieving the Dream partners with you to

- Foster a culture where evidence and curiosity lead the way
- Align your teams, processes, systems, and technology so that everyone is moving toward the same goals
